

COMMONWEALTH PLYWOOD DISTRIBUTION

Update on COVID-19

To all our customers and partners,

According to the Ontario government we are a supplier to an important portion of the industry and are allowed to pursue our activities. All of our Ontario facilities are still open for business and able to answer your call and request.

We support this drastic measure and stand in solidarity with our communities who will continue to fight this invisible enemy in order to reduce its impact on our lives.

Sales Representatives will be available during this crisis to answer your questions in order to be proactive and ready when your business goes back to normal. Our staff are able to work remotely to answer all your questions and can take your orders to schedule them according to your needs as soon as activities are requesting them. We will be able to respond quickly and give you the opportunity to restart your projects faster. We assure you of our continued presence in order to support you and thus reducing the negative impacts of this measure on our industry.

As always, our Ecommerce website is functional, 7 days a week, 24 hours a day throughout this time period. For any assistance regarding our transactional site, please contact **webmaster@commonwealthplywood.com**.

We will see you soon and in good health. Take care of yourself and your loved ones.

Commonwealth Plywood Distribution Management Team.
